

Sustainable, international, visionary – IVK Europe says „Thanks“ for a very special Techtextil!

A total of 1.501 national and international exhibitors from 57 countries presented the whole range of applications for textile materials and technologies. The strong growth of the sector was demonstrated by the increased number of exhibitors in 2019.

Eleven product groups reflect the full technical textiles, non-wovens and innovative garment textile supply chain.

Twelve application areas comprehensively span the full range of potential uses of modern textile technologies. Most recent developments were shown such as a new membrane called “ATLAS Architecture” from one of the IVK member companies which owes its name to the Titan from the Greek mythology.

A comprehensive supporting programme also informed people about current developments and trends in this sector.
